Laser Engraving Service

ABUS offers custom padlock engraving on all padlocks and keys.
Engraving can be done on all four sides of the padlocks and a key marking can also be placed on the corresponding key.

KD, KA, MK and GMK

ABUS also offers a keying service for the 24RK, 65, 72, 74, 76, 82, 83, 88, 93RK and Granit Padlocks as well as E50 and EC660 cylinders

ABUS is a strong and experienced partner for locksmiths to create comprehensive and intelligent keying systems based on individual needs and requirements. These include Key to Differ, Keyed Alike, Master Keyed and Grand Master Keyed systems.

Full records of all our systems are kept on a secure server for easy reordering as well as to ensure no duplication of systems.

Contact your nearest BBL branch for more information.

TITALIUM PADLOCKS

ABOUT TITALIUM PADLOCKS

Security for the future – the padlocks of the TITALIUM™ range

TITALIUM™ padlocks, from security specialist ABUS, represent a new dimension in security. Made from an innovative material, they represent high security at a significantly reduced weight.

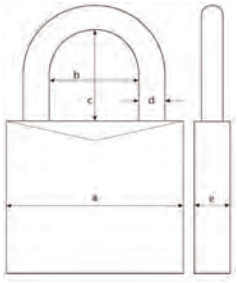
The TITALIUM™ material is a special aluminium alloy that uniquely combines a high level of torsion with lightness. Like in the aircraft industry, with TITALIUM™, ABUS is concentrating on two fundamental qualities: maximum strength and light weight. This contemporary material implementation is reflected in the design of the products: TITALIUM™ series padlocks all feature an impressive stainless steel like finish.

TITALIUM™ - Light and secure

With approximately 30% reduced weight compared to traditional brass padlocks with at least the same level of security, the TITALIUM™ lock series becomes an attractive alternative. There are many applications where reliable security but also weight is significant - when travelling, mobile situations or for securing goods in transit. TITALIUM™ series represents a new generation of secure, innovative padlocks.

TITALIUM™ – Strong, lightweight, innovative

83AL SERIES - PATENTED TITALIUM PADLOCKS



RK
rekeyable

Available Keyed Alike

Available Master Keyed

- Solid lock body made from TITALIUM™ alloy: light, but secure
- Shackle made from hardened steel with NANO PROTECT™ coating
- Double-bolted with ball bearings
- Patented "Z-bar" for 2-in-1 function: converts key-retaining to non-key-retaining and vice versa within seconds
- Patented "Pinning Window" makes rekeying of the Cylinders very easy
- Cylinders can be taken out and can be rekeyed to match an existing key
- Easy shackle change: Shackle can be exchanged within seconds
- Profiles available: Yale, CISA, Master, American Lock, 888 ABUS, EC660, WY

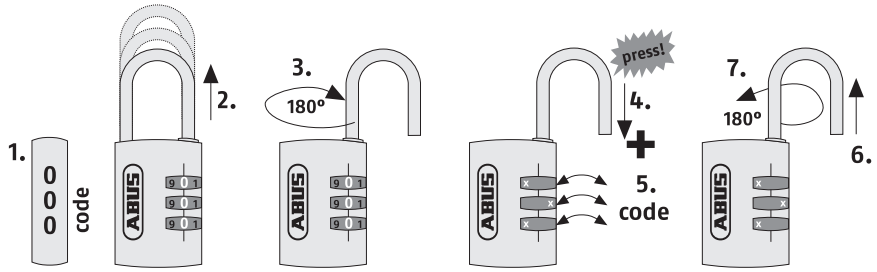
ABUS Security Tech Germany

COMBINATION PADLOCKS

HOW TO CHANGE YOUR LOCK COMBINATIONS



1. Set code to 0-0-0 (factory default)
2. Open the shackle
3. Rotate the shackle 180°
4. Push the shackle down and hold
5. While holding the shackle down set the new combination
6. Lift the shackle and rotate it 180° to its original position
7. Combination has now been changed

145 - ALUMINIUM COMBINATION PADLOCKS

- Solid aluminium lock body with anodized coating – corrosion resistant
- 145/20 and 145/30: Resettable 3-digit code
- 145/40: Resettable 4-digit code
- Handy operation without key, low weight
- 4 colours: blue, yellow, green, red

ABUS SHACKLES

HARDENED
Is a chrome-nickel plated shackle made from hardened steel. This combination provides extremely high resistance against attack and corrosion.

NANO PROTECT™
NANO PROTECT™ is an additional coating which provides ultimate corrosion protection for the hardened steel shackle.

STAINLESS
This material features extemely high corrosion resistance and is especially suited for wet conditions.

BLACK GRANIT™
Originally developed for the secure locking of high security compounds. Black GRANIT™ is made from hardenend special steel.

INDUSTRIAL SAFETY

74 SERIES

Available key ways:
RH6, LH6, W25L
W25R

- Lock body made from solid aluminium
- Available with brass body
- Inner components made from rustfree materials
- High precision 6-pin cylinder for better tamper resistance
- Automatic locking: Locking without key by pushing down the shackle
- Shackle made from hardened steel
- Key Retaining
- Body and shackle insulated against electric shock

Colours available:
Black, blue, brown, green, grey, orange, purple, red, white and yellow.

ABUS LOCK LUBRICANT - PS88

ABUS PS88 Lock Lubricant Spray is silicone free and leaves no residue.

It prevents attraction of dust and dirt as well as corrosion for non ferrous metals from salt, water & humidity.

It features low viscosity and will easily go into every gap and corner. Specially formulated to extend the life of locks and other items with small moving parts.

Effective corrosion protection for non ferrous metals from salt, water & humidity, it prevents locks freezing in winter

It contains additives against oxidisation and degradation, so the lubrication effect lasts longer

ABUS is a quality manufacturer providing a large product range of innovative security solutions in the areas of security at home, mobile security and commercial security.

TSA TRAVEL PADLOCKS

1 2 3

- Resettable 3 digit combination
- Not suitable for outdoor use
- Ideal for luggage when traveling

In the United States the Transportation Security Administration (TSA) requires access to luggage without the passenger being present; to allow travelers to lock their luggage they have accepted certain locks which they can open and relock.

Every lock with the Travel Sentry identifying mark (red diamond) is accepted by the TSA and may be opened by the TSA using their master keys.

PADLOCKS

AIR KEY

AirKey makes your life easier and gives you greater independence. With AirKey you can open doors with your smartphone, send keys via SMS and easily organise your entire access control system.
Consequently, AirKey offers you maximum freedom and maximum security – professionally or privately.
With AirKey, all that's replaced is the Cylinders in your door. With long battery life of 30,000 access events (or 12 months usage) before changing common CR2 batteries.

Geotagging
Send your AirKey lock location to users, perfect for short term clients or locks (and padlocks) located across multiple sites.

Send a Key
Simply send electronic keys to contractors, community hall or sporting facility hires and more.

For iPhone & Android
Be it iPhones or Android smartphones, AirKey gives you the choice how to unlock your doors.

Data Security
End-to-end and SSL-encrypted data transfers. Secure as online banking.

PADLOCKS

EPS PADLOCKS

Available Keyed Alike

Available Master Keyed

Restricted Profiles Available

Suitable for the most harshest environments, simple key alike systems, small master key systems through to large complex multi level master key systems.

EVVA EPS is not a simple pin-tumbler system. EPS employs unique, patented features to harden it against lockpicking, drilling and key bumping, as well as making key theft and illicit duplication more difficult. At the front of the Cylinders more hardened steel pins provide additional intrusion-resistance.

ICS PADLOCKS

Available Keyed Alike

Available Master Keyed

Thanks to ICS you boost the convenience of your system, can rely on planning and investment security as well as the durability and long service life of the system.

ICS is a durable, reversible key system with such extraordinary levels of calculation features that master key systems can be planned ahead to take into account potential extensions. Be it office buildings, schools or student residences, ICS will convince you.

Available with Stainless Steel Shackle

ABUS LOCK LUBRICANT - PS88

ABUS PS88 Lock Lubricant Spray is silicone free and leaves no residue.

It prevents attraction of dust and dirt as well as corrosion for non ferrous metals from salt, water & humidity.

It features low viscosity and will easily go into every gap and corner. Specially formulated to extend the life of locks and other items with small moving parts.

Effective corrosion protection for non ferrous metals from salt, water & humidity, it prevents locks freezing in winter

It contains additives against oxidisation and degradation, so the lubrication effect lasts longer

ABUS is a quality manufacturer providing a large product range of innovative security solutions in the areas of security at home, mobile security and commercial security.

ABUS LOCK LUBRICANT - PS88

ABUS PS88 Lock Lubricant Spray is silicone free and leaves no residue.

It prevents attraction of dust and dirt as well as corrosion for non ferrous metals from salt, water & humidity.

It features low viscosity and will easily go into every gap and corner. Specially formulated to extend the life of locks and other items with small moving parts.

Effective corrosion protection for non ferrous metals from salt, water & humidity, it prevents locks freezing in winter

It contains additives against oxidisation and degradation, so the lubrication effect lasts longer

ABUS is a quality manufacturer providing a large product range of innovative security solutions in the areas of security at home, mobile security and commercial security.

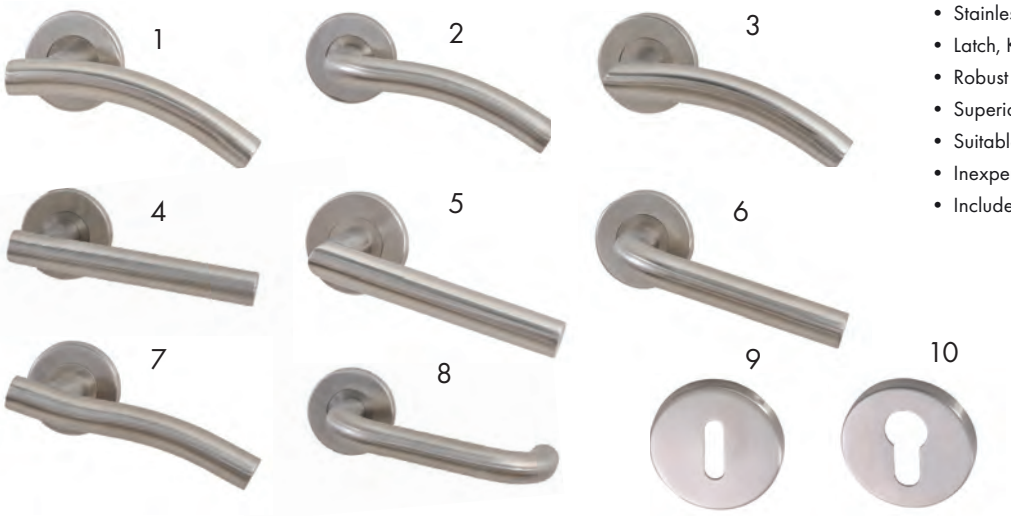
Stainless Steel 304 VS 201, What Is The Difference Between The Two?

201 stainless steel is a substitute for 304 steel. And 304 stainless steel contains 18% chromium and 9% nickel in standard. In comparison, the content of nickel and chromium in 304 is higher than that in 201, so the rust resistance of 304 is much better than that of 201.

HANDLES

HANDLES ON ROSE - TUBULAR STAINLESS STEEL



- Stainless steel finish
- Latch, Keyhole, Cylinders or Bathroom W/C
- Robust slotted spindle fixing
- Superior springs to prevent handle droop
- Suitable for door thicknesses up to 55mm

ABUS LOCK LUBRICANT - PS88

ABUS PS88 Lock Lubricant Spray is silicone free and leaves no residue.

It prevents attraction of dust and dirt as well as corrosion for non ferrous metals from salt, water & humidity.

It features low viscosity and will easily go into every gap and corner. Specially formulated to extend the life of locks and other items with small moving parts.

Effective corrosion protection for non ferrous metals from salt, water & humidity, it prevents locks freezing in winter

It contains additives against oxidisation and degradation, so the lubrication effect lasts longer

ABUS is a quality manufacturer providing a large product range of innovative security solutions in the areas of security at home, mobile security and commercial security.

ABUS LOCK LUBRICANT - PS88

ABUS PS88 Lock Lubricant Spray is silicone free and leaves no residue.

It prevents attraction of dust and dirt as well as corrosion for non ferrous metals from salt, water & humidity.

It features low viscosity and will easily go into every gap and corner. Specially formulated to extend the life of locks and other items with small moving parts.

Effective corrosion protection for non ferrous metals from salt, water & humidity, it prevents locks freezing in winter

It contains additives against oxidisation and degradation, so the lubrication effect lasts longer

ABUS is a quality manufacturer providing a large product range of innovative security solutions in the areas of security at home, mobile security and commercial security.

CYLINDERS

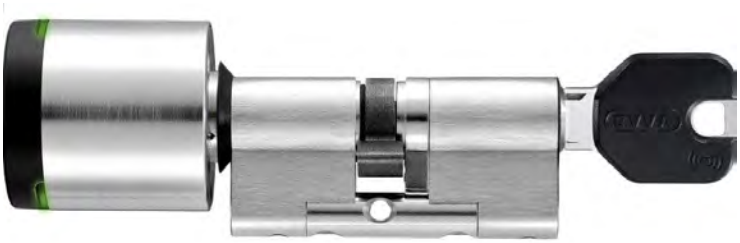
AIR KEY



AirKey makes your life easier and gives you greater independence. With AirKey you can open doors with your smartphone, send keys via SMS and easily organise your entire access control system.
Consequently, AirKey offers you maximum freedom and maximum security – professionally or privately.

With AirKey, all that's replaced is the Cylinders in your door. With long battery life of 30,000 access events (or 12 months usage) before changing common CR2 batteries.

Geotagging
Send your AirKey lock location to users, perfect for short term clients or locks (and padlocks) located across multiple sites.

Send a Key
Simply send electronic keys to contractors, community hall or sporting facility hires and more.

For iPhone & Android
Be it iPhones or Android smartphones, AirKey gives you the choice how to unlock your doors.

Data Security
End-to-end and SSL-encrypted data transfers.

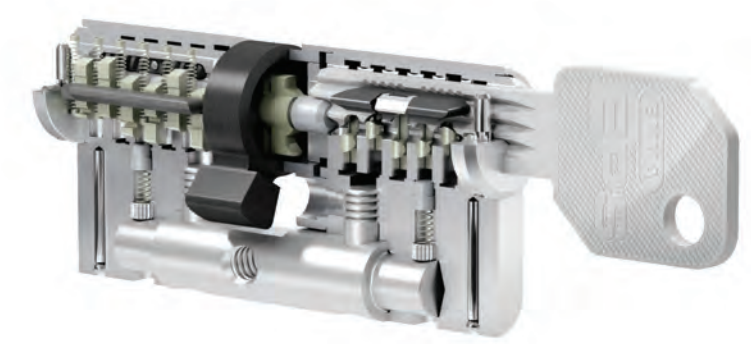
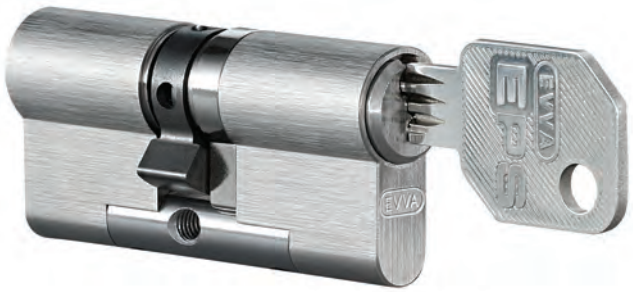
EPS CYLINDERS

EXTENDED PROFILE SYSTEM (EPS)





Available Keyed Alike

Available Master Keyed

Restricted Profiles Available

EPS is a restricted master key system that combines high security with both high quality and high value. The system is suitable for installations ranging from a single door to the large and complex master key systems.

Suitable for the most harshest environments, simple key alike systems, small master key systems through to large complex multi level master key systems.

THE EPS HIGH-SECURITY SYSTEM OFFERS A COST-EFFECTIVE WAY TO IMPLEMENT A COMPLEX AND RESTRICTED MASTER KEY SYSTEM.

AirKey. Simply smart

With AirKey the smartphone is the key. It increases your levels of security, flexibility and gives you full control over your doors. But what do you need? With an AirKey cylinder, a smartphone as well as Internet access you will be able to send your keys by text message (SMS) and to manage your electronic locking system online. Well, if that's not smart!

AirKey top features

- Send keys via the Internet
- Free app and online administration
- For small and complex master key systems
- Maximum data security

ABUS LOCK LUBRICANT - PS88

ABUS PS88 Lock Lubricant Spray is silicone free and leaves no residue.

It prevents attraction of dust and dirt as well as corrosion for non ferrous metals from salt, water & humidity.

It features low viscosity and will easily go into every gap and corner. Specially formulated to extend the life of locks and other items with small moving parts.

Effective corrosion protection for non ferrous metals from salt, water & humidity, it prevents locks freezing in winter

It contains additives against oxidisation and degradation, so the lubrication effect lasts longer

ABUS is a quality manufacturer providing a large product range of innovative security solutions in the areas of security at home, mobile security and commercial security.

AirKey. Simply smart

With AirKey the smartphone is the key. It increases your levels of security, flexibility and gives you full control over your doors. But what do you need? With an AirKey cylinder, a smartphone as well as Internet access you will be able to send your keys by text message (SMS) and to manage your electronic locking system online. Well, if that's not smart!

AirKey top features

- Send keys via the Internet
- Free app and online administration
- For small and complex master key systems
- Maximum data security

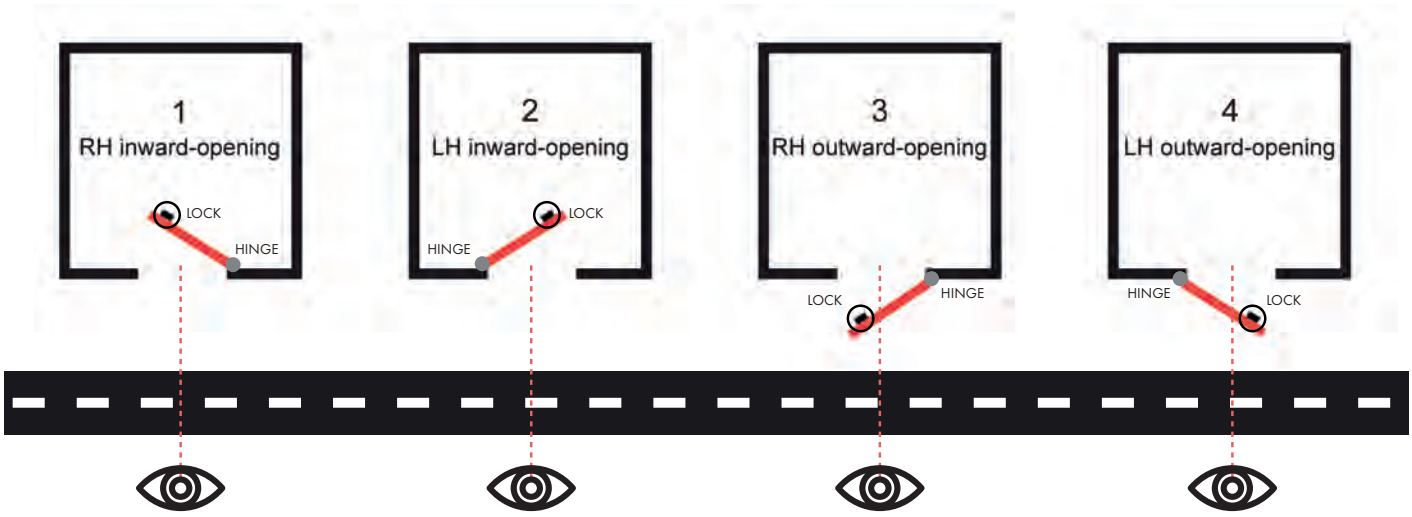
HOW TO DETERMINE DOOR HAND



Door hand is determined by the location of the HINGE when viewing the gate from the OUTSIDE LOOKING IN

ELETTRIKA FOR STEEL GATES - NON-HANDED

Available without button

- Withstands 2000kg of force
- Non-handed
- Lasts more than 1 million duty cycles
- Available with zinc plated case
- Variable backset from 50 to 80 mm
- Self-adjusting striker active both vertically (gate uprights) and horizontally (variable distance between gate leaf and gate frame)
- Patented system
- Replacement Cylinders: OG150-00-00

07022-00-00

07022-00-00 (BOOSTER)

- To adapt: 12V DC - 24V DC - 24V AC
- Booster guarantees sufficient power supply to a lock

FAIL SAFE AND FAIL SECURE - WHAT IS THE DIFFERENCE?

Locking devices can be either “fail safe” or “fail secure”.

Fail-secure locking devices remain locked when power is lost.

Fail-safe locking devices are unlocked when power is lost.

Main door = A
use only lateral locking points (one or more)

Independent door = C
always use only top and bottom locking points

Secondary door = B
always use only top and bottom locking points

CISA "FAST" Panic Exit Devices

- New sturdy design
- Technically advanced
- Reduces installaion time by 50%
- 2 hours fire rated
- Conforms to ENN1205:2008

Supplied with:

- Special Strikers
- Fixing Screws
- Installation & Maintenance Instructions

PANIC EXIT HARDWARE

ABOUT BRITON

The Briton exit hardware range provides products suitable for single and double door applications for both public and non public buildings

When lives may depend on a exit device Briton feel they have a responsibility to design and test products to exceed all current performance and safety standards, ensuring they will operate first time, everytime.

Rigorous testing is continually being carried out on the Briton range of exit hardware providing peace of mind.

- **CE Certified**
- **Conforms to EN 1125 and EN 179**
- **5 YEAR GUARANTEE**
- **Suitable for Use in Public Buildings**
- **4 HOUR FIRE RATING ON STEEL DOORS**
- **2 HOUR FIRE RATING ON TIMBER DOORS**

BRITON PANIC EXIT HARDWARE

376E-97
- Two point locking
- Suitable for use on single or double doors up to 2500mm high, 1300mm wide
- Adjustable top and botton shoots

378E-97
- Suitable for use on single door and the first opening leaf of double doors with rebated meeting stiles
- Supplied left or right hand, but can be reversed on site
- Suitable for doors up to 1300mm wide

377E-97
- For rebated door frames, 1300mm wide, 2500mm high
- Adjustable top and bottom shoots

1413E-97
- Designed to fit with all Briton 376 devices.
- Supplied with cylinder
- Fixings supplied.
- Suitable for doors 40mm to 70mm thick

CODE	DESCRIPTION	BARCODE
376E-97	Briton Push Bar - Vertical Panic Bolt	N/A

PANIC EXIT HARDWARE

880 SERIES

880 series exit hardware

UNION Architectural Hardware introduces an innovative and contemporary range of exit hardware, exclusively designed to suit higher specification new build and replacement markets.

The UNION 880 Series combines quality engineering and high performance with contemporary aesthetics. The range boasts maximum versatility, comprising of both 'touch bar' and 'push bar' variants for single and double doors.

The new range offers a lighter, smoother and quieter alternative to the traditional bolting action. For single doors there is a choice of either a single point latch variant, or 2/3 point locking using upper and lower Pullman latches. For double doors, a choice of 3 and 5 point locking is available.

Guaranteed for 10 years, the UNION 880 Series is CE marked to BS EN 1125* and fire tested to BS EN 1634 on both timber and metal doors.

881T TOUCH BAR RANGE

- Max. door leaf width: 900mm to 1200mm
- Max. door leaf height - 2350mm
- Max. door leaf mass - 200kg
- Non-handed for maximum flexibility

CODE	DESCRIPTION
881T	For use on Single Doors 900mm wide

CAMLOCKS

AIRKEY

AirKey makes your life easier and gives you greater independence. With AirKey you can open doors with your smartphone, send keys via SMS and easily organise your entire access control system.

With AirKey, all that's replaced is the Cylinders in your door. With long battery life of 30,000 access events (or 12 months usage) before changing common CR2 batteries.

Geotagging
Send your AirKey lock location to users, perfect for short term clients or locks (and padlocks) located across multiple sites.

Send a Key
Simply send electronic keys to contractors, community hall or sporting facility hires and more.

For iPhone & Android
Be it iPhones or Android smartphones, AirKey gives you the choice how to unlock your doors.

Data Security
End-to-end and SSL-encrypted data transfers. Secure as online banking.

KEYGARAGE™

787 SMART-BT

Smart means keeping it simple: Our KeyGarage™ 787 Smart-BT can be operated over Bluetooth® via an app.

Our **KeyGarage™ 787 Smart-BT** for wall mounting is a great option for holding up to 20 keys, three car keys or up to 30 plastic cards on a temporary and flexible basis for various groups of people. As an admin, you can generate a six-digit key code for others in the app, which will give them access to whatever is stored in the smart KeyGarage without the use of a smartphone; e.g. for guests in a holiday rental, workers, cleaning service, mobile care services and more. Another option is to send an electronic access ticket via the app. Our Bluetooth®-KeyGarage has the current most secure AES-128-Bit encryption. Inside there are two hooks for keys. The batteries can be changed any time without having to open the KeyGarage™ 787 Smart-BT.

We recommend using the KeyGarage™ 787 Smart-BT on the wall in a protected outdoor area.

Size: W: 82,5 mm x H: 120 mm x D: 63 mm

ABUS Security Tech Germany

WALL & FLOOR ANCHORS

WA50

- The anchor allows the locking of two-wheel vehicles in garages, cellars, at houses and carports. The WA 50 is meant for wall installation.
  In combination with a high level ABUS lock it builds a very secure unit.
- Strong wall anchor made of special hardened steel
- Mounting accessories included

CODE	DESCRIPTION	HEIGHT	WIDTH	BARCODE
WA50	Abus Wall Anchor	240	174	N/A

WBA-100

- The anchor allows the locking of two- wheel vehicles in garages, cellars, at houses and carports.
- The WBA 100 can be mounted to the ground as well as to the wall.
- In combination with a high level ABUS lock it builds a very secure unit.
- 16 mm round shackle made of special hardened steel for highest resistance
- Mounting accessories included
- Due to the flat design and the high quality plastic, the WBA can be overrun by vehicles without any problem e.g. in garages
- The WBA 100 is weatherproof and can be installed indoors or outdoors

CODE	DESCRIPTION	HEIGHT	WIDTH	BARCODE
WBA-100	Abus Floor And Wall Anchor	160	165	N/A

CABLES AND CHAINS

HIGH SECURITY CHAIN

Padlocks in combination with cables and chains are ideal for securing a wide range of objects individually.

High-security chains with hardened eyes are not only suitable for securing bikes. Ladders, generators and other outdoor objects on the company premises can be secured in this way. In public areas, too – from chairs in front of cafés to machinery on building sites – cables and chains offer flexible security options.

- Hardened steel chain
- With a longer last chain link for easy locking with a padlock
- Edge protection thanks to high-quality textile jacket
- For securing bicycles, motorbikes, garden tools and furniture or machinery on construction sites
- For use with a padlock

4	**FOR-P000021**	Battery 6V 4.5 AH Sealed Led

LEAD BATTERY

AGM – (Absorbed Glass Mat technology)

SLA – (Sealed Lead Acid)

12 Volt battery – Typical applications: Alarms, Gate motors, power packs, UPS, electric fence energizers.

A sealed lead acid battery can only go down to 40% of its capacity (+/- 7Volts) and it would still charge back to capacity there after the cells die and the battery will be unusable.

GEL BATTERY

AGM – (Absorbed Glass Mat technology)

Gel – the battery consists of gel packs that are inserted as appose to acid.

12 Volt battery – Typical applications: Alarms, Gate motors, power packs, UPS, electric fence energizers.

A sealed gel can only go down to 20% of its capacity (+/- 5.5Volts) and it would still charge back to capacity there after the cells die and the battery will be unusable.

ACCESS CONTROL

ET-BLU MIX - LONGEST RANGE TRANSMITTERS - 434MHz

- Most Secure transmitter in Africa
- Enhanced rolling code – An industry first (© G&C Electronics CC T/A E.T. Systems 2010)
- Backward compatible
- Fully compatible with E.T. rolling code receivers and ET Products
- Multifunctional and versatile
- Can be used to automate: Magnetic Locks, Garage and gate motors, Alarms and Pool pumps
- Can program each button individually
- Stylish and compact design
- Durable and robust
- Keelog rolling code system
- ICASA approved
- Up to 400m
- Radio clutter free environment.
- Clear line of sight.

Available blister packed with barcodes

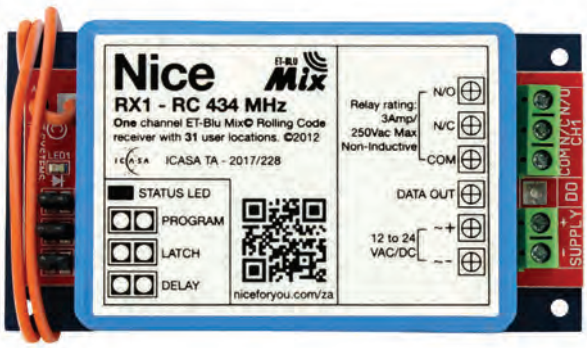
ET-BLU MIX ROLLING CODE RECEIVER - 434MHz - 1 CHANNEL



- Operating frequency 433.92MHz (403.55MHz optional)
- Operating voltage 12-24V AC/DC.
- Single relay output. (N/O & N/C)
- Master transmitter function for the adding of additional transmitters.
- Removal of individual transmitters. (transmitter to be removed required)
- Audible programming indication.
- Memory full indication.
- Selectable latch/non latch relay output.
- Adjustable output relay activation time. (0.25-60 seconds)
- Output relay rating – 3Amps/12VDC/220VAC

CODE	DESCRIPTION	BARCODE
ET728	Single Channel Rolling Code Receiver 434MHz	6009695289152

ET-BLU MIX ROLLING CODE RECEIVER - 434MHz - 3 CHANNEL

- Operating frequency 433.92MHz (403.55MHz optional)
- Operating voltage 12-24V AC/DC.
- Three relay outputs. (Channel 1 N/O & N/C. Channel 2 & 3 N/O)
- 31 Users
- Button to channel selection not limited.
- Individual transmitter removal. (transmitter to be removed required)
- Selectable latch/non latch relay output per channel.
- Adjustable output relay activation time. (0.25-55 seconds per channel)
- Output relay rating – 3Amps/12VDC/220VAC per channel.

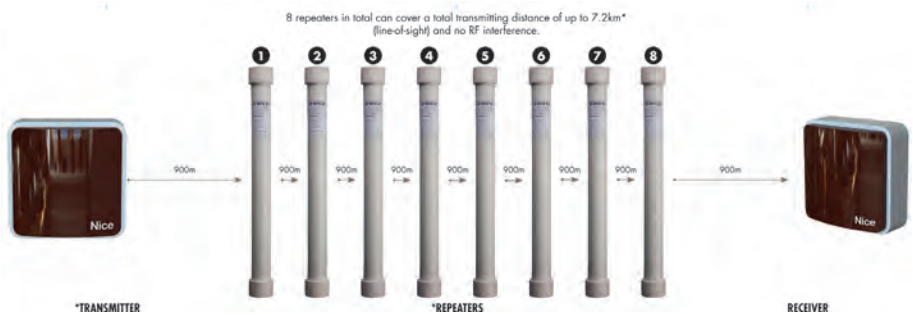
ACCESS CONTROL

ET-BLU MIX ROLLING CODE RECEIVER - 434MHz - CONDOMINIUM

- Operating frequency 433.92MHz (403.55MHz optional)
- Operating voltage 12-24V AC/DC.
- Single relay output (N/O & /N/C)
- 999 transmitter locations.
- Individual transmitter adding and removal.
- On board memory location display.
- Selectable power save mode.
- Receiver memory can be duplicated via condo receiver programmer.
- Output relay rating – 3Amps/12VDC/220VAC

CODE	DESCRIPTION	BARCODE
ETRXC	Remote Receiver ET Rolling Code 999 condominium 434MHz	6009699130771

ENHANCED ROLLING CODE REPEATERS - 434MHz



- 8 repeaters can cover a total transmitting distance of up to 7.2km (line of sight) with no RF interference
- Assists in increasing the transmission range capability of the ET high powered transmitters
- Standard ET Blue and ET Blu-mix transmitters
- Operates the following over a long distances: Farm gates, Farm pumps, Complex/business park gates, Alarm and panic systems, Lights/security lights, Electric fence energizers etc.

CODE	DESCRIPTION
ET02915-000	ET 2 Channel, high powered, enhanced rolling code, weatherproof transmitter. 434MHz
ET1400	ET High powered, enhanced rolling code, weatherproof repeater. 434MHz
ET02735-000	ET 2 channel, enhanced rolling code, weatherproof receiver. 434MHz

ET-BLU MIX - LONGEST RANGE TRANSMITTERS - 404MHz

Sliding Gate Operators

Drive 300

Designed for residential sliding gates, up to 300 kg

Features:

- COST EFFECTIVE residential sliding gate automation
- TOUGH DC MOTOR with removable brushes for easy maintenance
- LED DISPLAY for easy programming and diagnostics
- SECURITY:
  - Gate and safety beam tamper alarm monitoring
  - Electronic locking of motor unit with remote control for added security
  - ET-Blu Mix® enhanced rolling code receiver on board

Drive 500

Designed for residential sliding gates, up to 500 kg

Features:

- PROVEN robust and reliable residential slide gate automation
- HIGH SPEED motor with removable brushes
- ADVANCED ELECTRONICS: with large backlit display for easy programming, diagnostics and fault reporting
- SECURITY:
  - Gate and beam tamper alarm monitoring
  - Pin code lockable programming
  - Optional heavy duty security bracket
  - ET-Blu Mix® enhanced rolling code receiver on board

Drive 600

Designed for high-traffic sliding gates, up to 500 kg

Features:

- PROVEN POWER PACK for high-traffic applications with true battery backup
- HIGH SPEED motor with removable brushes
- ADVANCED ELECTRONICS with large backlit display for easy programming, diagnostics and fault reporting
- SECURITY:
  - Gate and safety beam tamper alarm monitoring
  - Pin code lockable programming
  - Optional heavy duty security bracket
  - ET-Blu Mix® enhanced rolling code receiver on board

Drive 1000

Designed for high-traffic sliding gates, up to 1000 kg

Features:

- HEAVY DUTY robust design for high-traffic industrial sliding gate automation
- Proven POWER PACK operation with true battery backup
- HIGH SPEED motor with intelligent control
- ADVANCED ELECTRONICS with large backlit display for easy programming, diagnostics and fault reporting
- Designed to house up to two 24V 3.5Ah batteries for extra internal battery backup
- SECURITY:
  - Gate motor and beam tamper alarm monitoring
  - Optional heavy duty security bracket
  - ET-Blu Mix® enhanced rolling code receiver on board

RUN 2500

Designed for heavy duty sliding gates, up to 2500kg

Features:

- EASY TO INSTALL: the BlueBUS system enables connections by means of just two wires between the control unit and up to 15 control safety and signalling devices.
- SAFE: the acceleration settings (at the start of the manoeuvre) and the deceleration settings (at the end of the manoeuvre) are precise and reliable.
- ADVANCED TEMPERATURE SENSOR: Run is able to manage force, adapting it to the different climatic and environmental conditions

TUB 4000

Designed for heavy duty sliding gates, up to 4000kg

Features:

- POWERFUL: ideal for automating large industrial gates up to 4000kg.
- FUNCTIONALITY AND SAFETY: programmable, with electromechanical brake to eliminate gate inertia. Self-ventilated motor to increase the working cycles.
- MAXIMUM DURABILITY AND SILENCE: bronze and metal gears.

Swing Gate Operators

24V Wingo and Titan Control Unit

BATTERY BACK-UP SHOULD POWER FAIL

ET-BLU Mix

WINGO

Designed for residential swing gates, with gate leaves of up to 3m each

Features:

- HI-SPEED operator for swing gate leaves up to 3m
- ROBUST cast aluminium design with powder coating
- LOW NOISE operation
- Proven POWER PACK operation with true battery backup
- LED DISPLAY for easy programming and diagnostics
- Magnetic encoder ensures reliable and precise obstacle detection
- ET-Blu Mix® enhanced rolling code receiver on-board

TITAN 510/680

Designed for residential or commercial swing gates, with gate leaves of up to 6m each

Features:

- EASY TO INSTALL, MAINTAIN & OPERATE
- Greater range of mounting positions reduces installation time & effort
- Easy action emergency release lever
- STRONG & RELIABLE:
- Solidly built for the toughest conditions
- Powerful drive system with intelligent load profiling safety technology
- Designed for low or high traffic applications

TOONA 7

Designed for industrial swing gates, with gate leaves of up to 7m each

Features:

- POWERFUL operator for swing gate leaves up to 7m
- ROBUST cast aluminium design with powder coating
- Proven POWER PACK operation with true battery backup
- LED DISPLAY for easy programming and diagnostics
- Magnetic encoder ensures reliable and precise obstacle detection
- Easy installation, operation and maintenance
- ET-Blu Mix® enhanced rolling code receiver on-board

ELITE

Designed for residential and industrial swing gates, with gate leaves of up to 4m each

Features:

- POWERFUL OPERATOR for swing gates up to 4m
- SOFT start/stop facility
- LED array and display for indication of gate motor status
- General purpose relay
- BATTERY BACK-UP
- Loop detector facility
- A.S.A.P mode ensures fast gate auto-close
- Optional plug-in receiver
- ET-Blu Mix® enhanced rolling code SMXI receiver- uncrackable, unhackable
- Lip function

Overhead Garage Door Operators

Digital display for easy programming and diagnostics

BATTERY BACK-UP SHOULD POWER FAIL

ET-BLU Mix

DC Blue ADVANCED Pico

Designed for residential sectional overhead and trackless tip-up garage doors of up to 10m²

COST EFFECTIVE GARAGE DOOR AUTOMATION

DC Blue ADVANCED

Designed for residential sectional overhead and trackless tip-up garage doors of up to 15m²

POWERFUL HIGH-TORQUE MOTOR

DC Blue ADVANCED Hi-Speed

Designed for residential sectional overhead garage doors of up to 10m²

HI-SPEED MOTOR

Features:

- ROBUST construction with metal chassis and gears
- RELIABLE and proven DC Blue Advanced technology
- INTELLIGENT door load profiling for added safety and control
- SIMPLE to program and fault find with 7 segment LED Display
- Sleek, modern design
- Safety beam input
- Selectable automatic closing time
- LED courtesy light; optional external light control
- Optional electronic lock control for added security
- Built-in ET-Blu Mix® enhanced rolling code receiver - Uncrackable, Unhackable

Drawbar available with either chain-drive or super silent, steel reinforced belt-drive

Technical specification	DC BLUE ADVANCED PICO	DC BLUE ADVANCED	DC BLUE ADVANCED HI-SPEED
Input voltage:	220-240 Vac, 50Hz-60Hz	220-240 Vac, 50Hz-60Hz	220-240 Vac, 50Hz-60Hz

SOON

Designed for commercial and industrial sectional overhead garage doors of up to 20m²

Features:

- ROBUST construction and reliable operation for demanding applications
- EASY TO INSTALL:
  - Fits onto shaft directly
  - Narrow profile - for limited space installations
  - Magnetic encoder - no need to adjust limit switches
- SAFE operation with obstacle detection
- PRECISION movement with adjustable speed and slow-down options
- Energy efficient design
- ET-Blu Mix® enhanced rolling code - Uncrackable, Unhackable

SUMO

Designed for commercial and industrial sectional overhead garage doors of up to 35m²

Separate Controller with Up, Stop and Down buttons

Features:

- STRONG motor and gearbox construction
- EASY TO INSTALL:
  - Fits on to shaft directly
  - Narrow profile - for limited space installations
  - Magnetic encoder - no need to adjust limit switches
- SAFE operation with obstacle detection
- PRECISION movement with adjustable speed
- BATTERY BACK-UP available with plug-in PS224 battery pack
- Service warning light for door maintenance
- ET-Blu Mix® enhanced rolling code - Uncrackable, Unhackable

Technical specification	SOON	SUMO
Input voltage: (Standard kit option)	230v AC, 50Hz-60Hz	230v AC, 50Hz-60Hz
Primary supply to the electric motor:	24V Toroidal transformer. Not battery dependant.	24V Toroidal transformer. Not Battery dependant.
Maximum duty cycle with mains present:	25%*	50%*
Maximum door size:	20m²	35m²
Applicable door types:	Sectional Overhead	Sectional Overhead or Two-Leaf Sliding
Torque (Nm):	50	120
Rated speed:	30 rpm shaft speed†	16 rpm shaft speed†
Receiver:	SMXI 434MHz, 4 channel, ET-Blu Mix® Enhanced rolling code. 999 user capacity.	SMXI 434MHz, 4 channel, ET-Blu Mix® Enhanced rolling code. 999 user capacity.

* At rated torque. † Dependent on factors such as door load, mains voltage, environment etc • Technical specifications subject to change

Roll-up Garage Door Operator

BATTERY BACK-UP SHOULD POWER FAIL

DC Blue ADVANCED ROLL-UP

DC BLUE ADVANCED ROLL-UP

Designed for residential roll-up garage doors up to 8m²

Features:

- COST EFFECTIVE residential roll-up door operator
- RELIABLE OPERATION through advanced door load profiling
- EASY INSTALLATION:
  - No physical limit switches to setup
  - A separate control box
- TRUE BATTERY BACK-UP (operator not battery dependant)
- BRIGHT LED light
- BETTER SECURITY:
  - ET Blue Mix® Receiver (Unhackable & Uncrackable)
  - Door Alarm Monitoring
  - Safety Beam Monitoring
  - Electric lock control feature
  - Holiday Lock-out

Separate control unit

Technical specification	DC BLUE ADVANCED ROLL-UP
Input voltage:	220-240 Vac, 50-60Hz
Electric motor supply:	24Vdc. Not battery dependent.
Maximum duty cycle with mains present:	25 full cycles per 24h @ max rate of 5 per hour
Number of operations on battery reserve without AC Present:	50 within 24 hours (From fully charged and healthy pair of 1,2Ah batteries)
Maximum door size:	8m²
Applicable door types:	Spring balanced, one-piece Aluzinc or Cromadek roll-up doors
Maximum running distance:	137 drum revolutions
Maximum pulling force prior to safety governing:	55Nm
Rated running load:	40Nm
Rated speed:	8m/min
Built-in receiver frequency:	433.92MHz
Built-in receiver compatible formats:	ET-Blu Mix © also compatible with ET Blue
Built-in receiver memory capacity:	31 user, 4 channels per user
Built-in receiver channels:	4CH (BT, Light, Aux Relay, Holiday lock-out)

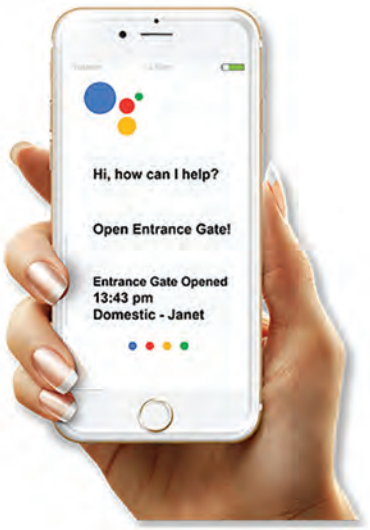
ACCESS CONTROL SYSTEMS

ET RECEIVER CLOUD LINK ACCENTRONIX INFINITY ACCRX2



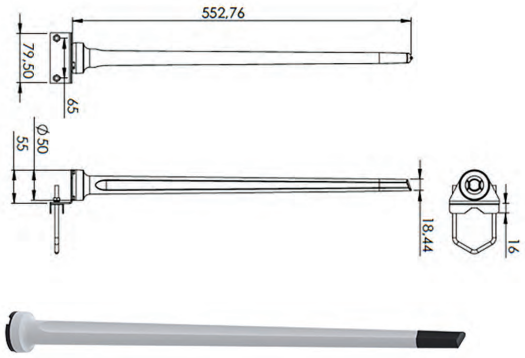
Link & Manage your remotes from the cloud
Monitor & manage and block remotes and users

Works With:
Cellswitch Nano – For your home.
Cellswitch Infinity – For Security Estates.
Wireless Intercom Infinity – For Security Estates.
ET Receiver Cloud Link Accentronix Infinity ACCRX2

Smart Remotes:
Monitor, manage and block remotes and users.
Restrict access for domestic, gardening and security services to specific days and times.
Feature-rich, easy to use the website for centralized management.
Remotes can bulk learned off-site.
Detailed log reports and access control notifications.
Replaces old tag systems.
Easy to install.
Works with Cellswitch Nano, Cellswitch Infinity, Wireless Intercom Infinity.

Additional Included Features:
Integrated with Google Assistant and Google Home – "Hey Google, Open the gate"
Missed-call access control.
Seamlessly extend the system to the resident's garage doors.
Installed in less than 5 minutes.

ANTENNA HIGH GAIN REPEATER



Cover the GSM 900, GSM 1800/UMTs and LTE Frequency bands
Increased connectivity stability
Machine-to-machine (M2M) capabilities
Consistent high gain over a very wide frequency range
Popular choice with installers because of its versatile base station
Vandal and water-resistant enclosure (IP 65)

KEY CUTTING MACHINES

CARAT QUATRO - FOR LATCH AND CYLINDER KEYS

- One of the best latch machines on the market. It is incredibly accurate, comfortable and easy to use
- Easy rotate jaw mechanism - no more swarf in your fingers - grooves milled away at the base
- 4 sided jaw
- Replaceable tracer point - quick and easy to replace
- Key gauge protection - carriage cannot move forward until the key gauge is in the down position
- Machine automatically starts running when carriage is moved forward

206 - FOR MORTICE AND GATE KEYS

- This is the heaviest mortice machine in its class - with linear guides as well as dampers to allow for extremely accurate key cutting
- Cuts mortice keys with sidewards, bullet wards, double bitted keys and flat steel keys.
- Key turret can be moved from left to right, allowing you to cut bullet and sideward keys without removing the keys from the jaw
- Fixed position locator on cutter turret to accurately align keys with the center axis of the cutter
- Cutter guard on main cutter as well as warding cutter

RST TM1011

Designed to cut conventional lever and side ward cuts, plus flat steel, rim and mortice , double bitted pin, pipe and safe key blanks and other specialist keys, using a simple lead screw action.

Fast and Reliable Mortice Machine
Is known for its accuracy and ease of operation.
Side and Bullet Warding easily cut.
Cuts long safe blanks.

KEY CUTTING MACHINES

BRAVO PROFESSIONAL - FOR LATCH AND CYLINDER KEYS

Bravo Professional, designed for professional key cutters, truly durable, ensures excellent cutting of any type of key: flat keys for Cylinders, vehicles and cruciform keys.

- All parts in motion are protected by special sheilds and covers
- Patented key-locking system with controlled movement knob to ensure perfect key locking
- Reversible 4 sided clamps with special surface hardening treatment
- Clamps with rapid rotation function and automatic alignment system

LANCER PLUS - FOR MORTICE KEYS AND GATE KEYS

Lancer Plus is a cutting machine for bit, double bit, and mail box keys.

- The face side and bullet cuts are carried out without removing the keys from the jaws.
- Microswitch for activating the cutting tools applied to the main joystick control lever.
- Two cutters, one for straight cuts, and one for side cuts and wards. The motor is covered by a protecting housing

REKORD - FOR FLAT / EDGE CUT KEYS

The REKORD features smooth and precise carriage movements, four-sided rotating clamps with ergonomic handles, mechanical tracer point with micro-metric adjustment, and wide tool compartments for making your daily work more practical and comfort-able.

The sintered four-sided clamps feature anatomic handles with a ball bearing system for perfectly fixing the key without damaging the clamp.

Rekord is equipped with a mechanical tracer point with micrometric adjustment ring nut for an easy calibration and quality cutting results.

KEY CUTTING MACHINES

DUO - DUAL KEY CUTTING MACHINE

Mechanical key-cutting machine for making copies of: flat Cylinders and vehicle keys and cruciform keys (left-hand carriage); bit and double bit keys and mail box keys (right-hand carriage).

- Dedicated shaft and carriage movement makes it possible to make excellent flares on bit and double bit keys.
- Cylinders keys carriage: four-sided revolving clamps.
- Bit and double bit keys carriage: two/three sided revolving clamps

TWISTER 2

Twister II is an easy to use, reliable and convenient mechanical key cutting machine delivering accurate and consistent duplicates of dimple, laser and Fichet® type keys.
The machine provides a range of optional accessories for expanding its capabilities to tubular keys and to a wide range of vehicle keys.

Designed to have a small footprint, Twister II is compact, light and built to last.

KEY CUTTING MACHINES

GLADAID - DUAL KEY CUTTING MACHINE

Model: GL-888A - STANDARD

- The 4 way jaw can hold keys up to 100mm long and any type of double side grooved key.

Model: GL-888C - DELUXE

- The specially designed carriage wheels control the carriages individually.

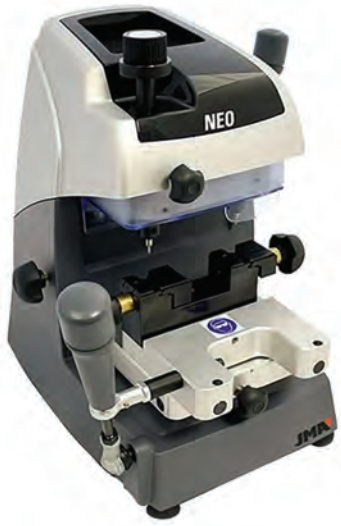
KEY CUTTING MACHINES

BERNA

Berna is the new model of compact professional key-duplicating machine, which combines simplicity and versatility for flat keys for cylinder locks, vehicles, cross-shaped keys, and special keys thanks to its 4-sided vice.

The latest technology and materials make it a durable duplicating machine for precision duplicating. It is compact, but preserves a robust design with clean lines and ergonomic use. Various guards cover all of the machine's moving parts to provide security to the user during use.

NEO



Neo is the machine that brings precision and simplicity together when copying dimple, laser and special keys. It brings new features to its class such as LED lighting and the protective screen in the work area.

This machine is the first in its category with a new jaw to clamp dimple and laser keys with no need for an adaptor (there is a grip area for VAG® group keys and another for Mercedes® keys).

NOMAD

The new JMA NOMAD key duplicating machine offers a compact design with the mobile locksmith in mind. The NOMAD precision, lightweight and compact design delivers a high quality duplication service. Make sure the Nomad is your next travel companion!

LIGHT AND EASY TO CARRY

The NOMAD is 6.5 Kg in weight, 26 cm in length and 5 inches between Jaws centers. It's the ideal solution for van set up and mobile locksmith professionals.

ABUS
Security Tech Germany

INDUSTRIAL SAFETY
SAFE WORKPLACE

74 Series safety padlocks are designed for lockout/ tagout applications and help keep equipment and employees safe from hazardous areas. This lightweight, non-magnetic, and dielectric padlock meets OSHA lockout regulations and is well suited for harsh industrial environments.

The Safety Redbox™ convinces through its handiness. Due to its low weight, it can easily be carried around. In addition, the Safety Redbox™ comes with a wall bracket and can be mounted to almost any surface.
