Care and Maintenance

Metals and Finishes

Keeping metal clean is important. Dust and moisture can damage it over time. Regular, simple cleaning works better than occasional deep cleaning.

Black Antique

Wipe the surface with a soft cloth and a little oil, then buff it dry.

Brass (Unlacquered)

Brass, an alloy of copper and zinc, naturally develops a protective patina over time. This patina, often green, helps guard against further corrosion. Clean gently with soapy water and dry thoroughly to preserve it. For a bright finish, occasionally polish with Brasso.

Lacquered Finishes

Dust regularly. Occasionally wash with soapy water, dry completely, and lightly buff to remove water marks.

Plated Finishes

Dust regularly. Occasionally clean with soapy water, dry thoroughly, and lightly buff to remove water marks.

Stainless Steel

Dust regularly. Occasionally wash with soapy water, dry well, and lightly buff. For outdoor use, use GT85 PTFE (or similar) spray on a cloth to clean dirt or discoloration.

PVD

Regular dusting is required. Occasional light wash with soapy water, dry thoroughly and buff lightly to remove any water marks.

Guarantees

**10 Year
Mechanical
Guarantee**

10 Year Mechanical Guarantee

Applies to all products (unless otherwise stated).

**25 Year
Mechanical
Guarantee**

**25 Year
Finish
Guarantee**

25 Year Finish Guarantee

Applies to all products with a PVD Finish.

BS EN 1634 European Fire Safety Standard entitled “Fire resistance and smoke tests for door and shutter assemblies, openable windows and elements of building hardware. Part 1: Fire resistance test for door and shutter assemblies and openable windows.” Fire evidence for individual items for door hardware means they are suitable for consideration for use on a fire door, it does not mean that the product can be fitted to every fire door. Any evidence gained must show that the hardware did not affect the integrity of the fire door-set in which it was tested with.
